Test	Results	Reference Range	Low	Normal	High
BRUCELLA	NEGATIVE				

Lab Comments: Asc: NYAB44367401 Profile: Brucella Canis Screen (Non-Export)

BRUCELLA: --Interpretation of IFA screening test results for Brucella canis--

A negative result usually means there is no infection with Brucella canis, although false negatives may occur in the first 8-12 weeks post infection. Dogs that have been exposed in the previous 12 weeks should be retested.

A positive result may be a false positive result or may be due to Brucella canis infection (Confirmatory testing to follow).
